The cervix is cleansed with a povidone-iodine solution (Betadine) to avoid the transfer of bacteria to the endometrial cavity during the procedure. A breakaway vaginal speculum is used so it can be removed before injection of the radiopaque medium. A single-tooth tenaculum is used to apply traction of the uterus and to correct any anteroflexion or retroflexion that yields suboptimal images. A ...

History of the paper industry. The commercial planting of domesticated mulberry trees to make pulp for papermaking is attested as early as the 6th century. Due to advances in printing technology, the Chinese paper industry continued to grow under the Song dynasty to meet the rising demand for printed books. Demand for paper was also stimulated by the Song government, which needed a large ...
