Headphones are a pair of small loudspeaker drivers worn on or around the head over a user's ears. They are electroacoustic transducers, which convert an electrical signal to a corresponding sound. Headphones let a single user listen to an audio source privately, in contrast to a loudspeaker, which emits sound into the open air for anyone nearby to hear.

Please use this as a guide only. It may no longer apply. With turntables, you cannot rely on the cartridge and stylus stated in the owners manual. This is because often times the cartridge and stylus are no longer original and have been changed to something newer, better or both by the end-user. The most accurate way to determine the correct replacement stylus is by the brand and model number ...

Binaural recording is a method of recording sound that uses two microphones, arranged with the intent to create a 3-D stereo sound sensation for the listener of actually being in the room with the performers or instruments. This effect is often created using a technique known as "dummy head recording", wherein a mannequin head is outfitted with a microphone in each ear.
