No single factor is more essential for hot tub or pool water quality than your filtration system. A soiled, clogged or worn-out spa filter will fail in its job of trapping contaminants. Old filters also put strain on your spa's pump and other equipment, which can waste energy dollars and reduce water circulation. Clean your filters with every water change and replace them annually to protect ...

We can however make some assumptions based upon an average usage pattern of 30 to 45 minutes use, 3 or 4 times per week (which is about average for most hot tub owners). The most energy-efficient hot tubs on the market will cost between 75p and £ 1.00 per day based on these assumptions at current energy tariffs of around 12-13p per kWh.

Hot Tub, Spa & Swim-spa Covers generally fail due to the ingress of water into the insulation 'core'. Many hot tub cover manufacturers use a 'bogstandard' plastic wrap to encapsulate the 'core' because it's cheap and 'easy' to work with. We don't! Our encapsulation wrap is more chemically 'resistant' and will survive the exposure for longer.
