The lengthy Israeli-Palestinian conflict has been a major problem in the modern Middle East. Many people argue that the “two-state solution” of creating an independent Palestinian state alongside the existing state of Israel would be the best approach to ending the conflict, although there is some disagreement over borders, refugees, settlements, Jerusalem, and other challenging issues.

This note should might be under the "strlen" manual page, but there is a better chance for more paying attention here (nevertheless I have made a short note over there allso). A loop function that test for the string length at each iteration takes forever (possibly due to "strlen" searches for the C-style string terminator - a binary 0 - every time..
