Technically speaking, SQL Server 2012 Availability Groups use the failover cluster feature, but don't have to have SQL Server Failover Cluster Instances (which is what relies on shared storage)– they can use the Availability Groups feature to keep nodes in sync without any shared storage at all, and these can be in different geographic regions. You can also have failover clusters where SAN ...

Offered by University of California, Davis. As data collection has increased exponentially, so has the need for people skilled at using and interacting with data; to be able to think critically, and provide insights to make better decisions and optimize their businesses. This is a data scientist, “part mathematician, part computer scientist, and part trend spotter” (SAS Institute, Inc.).

### [Third Edition Supporting Material](#)

SQL Server varchar is widely used in displaying data in the desirable formats using Convert and Cast functions in SQL Server. Real data deals with a mix of data types and it has to be compatible with each other (i.e. belong to the same data type), before we make comparisons to them. SQL Server supports both implicit and explicit conversions.
